SUMMARY

Proactive Associate Software Engineer with 6+ months of hands-on experience in full-stack development with a strong emphasis on cloud-focused solutions. Experienced in API integration, serverless design, and cloud migration. Skilled in Python, FastAPI, Node.js, AWS, and cloud automation with strong problem-solving skills.

SKILLS

- **Languages:** Python, JavaScript, SQL, HTML/CSS, Node.js, Java
- **Frameworks:** FastAPI, Flask, Express.js, Spark
- **Cloud:** AWS (EC2, S3, Migration Service, CloudWatch, IAM), GCP (Instance, Cloud SQL, Migration Service, Load balancer)
- **DevOps:** Docker, Kubernetes, Jenkins, Ansible, Git, Prometheus, Grafana, Terraform
- **Tools:** Postman, VS Code, MongoDB, UiPath Studio, Telebit

EXPERIENCE

Associate Software Engineer | Cognitive Mobile Technology Pvt. Ltd. | Dec 2024 – Present

- Worked on multiple web applications involving full-stack development using FastAPI (Python), SQL, and vanilla JavaScript/HTML/CSS, collaborating within a team of 3.
- Led the development of a solo no-code project using Node.js and Express, form generation, dynamic UI components, API calls, and chatbot integration functionality.
- Integrated external APIs and services for session management, chatbot interactions, and application-specific redirection, enhancing user engagement.
- Designed chatbot-like flows using preset questions and programmable API calls to trigger context-aware navigation and backend processes.
- Built and maintained an appointment booking system, allowing users to select time slots based on dynamic provisioning rules and external configurations
- Created reusable UI components with modular integration and responsive frontend interfaces.
- Integrated reusable components and API calls to work across multiple applications

Languages & Frameworks: Python, FastAPI, Flask, SQL, Node.js, Express, JavaScript, HTML, CSS

Tools & Libraries: Git, Postman, REST APIs

PROJECTS

- **KeyValue DataStore** – Developed a Python-based key-value store with support for TTL, batch inserts (up to 50 keys), thread safety, and file locking mechanisms for concurrency handling (Python, JSON).
- **Database Migration** – Migrated an on-premises SQL database to Google Cloud SQL using GCP's Database Migration Service. Established a secure tunnel using Telebit to allow the local server to connect to the internet and perform seamless data transfer.(GCP, SQL, Telebit).
- **SecureCloud Custom Drives** – Designed a secure file storage system using multi-layered encryption and steganography. Leveraged Google Drive and Dropbox APIs for cloud integration, ensuring confidentiality and integrity during transfer. Encrypted and embedded sensitive files before cloud transfer (Python, MongoDB, Google Drive API, Dropbox API).

EDUCATION

B.E. Computer Science and Engineering | Rajalakshmi Institute of Technology | 2024 | CGPA: 8.35

HSC | Velammal Matric Hr. Sec. School | 2020 | 68%

SSLC | Velammal Matric Hr. Sec. School | 2018 | 78%

CERTIFICATIONS & COURSES

- AWS Training – Cubensquare (2024)
- DevOps Training – Cubensquare (2024)
- RedHat Linux Training – Cubensquare (2024)
- Getting Started with MongoDB Atlas
- Certified Secure Computer User v2
- UiPath Studio Family – Learnathon India (2022)
